

Il sistema per macinare il pepe, composto di più elementi, è realizzato attraverso numerose fasi delicate e complesse. La macina in particolare, grazie ai procedimenti di tempra e cementazione ed all'esclusiva sagomatura interna, garantisce la desiderata grana e la giusta quantità di pepe. Essa infatti, lavora secondo un semplice meccanismo "autocentrante" che ne evita il blocco o la rottura e consente di variare la macinatura da grossa a fine.

Erbe o peperoncino, pepe e sale per caratteristiche proprie necessitano ognuno di un diverso tipo di macina: in acciaio di grande dimensione per i primi, più piccolo per il secondo ed in ceramica per il terzo.

Composed of a number of elements, the system for pepper grinding is produced through a series of delicate and complex procedures.

More specifically the mill itself, as a result of hardening and casehardening procedures and the exclusive internal form, guarantees the desired type of grind and the correct amount of pepper. Effectively it operates on a simple "self-centring" mechanism, which avoids blockage or breakage, and enables the grind to be adjusted from coarse to fine.

Herbs, chilli pepper, pepper and salt all have specific characteristics which require a different type of mill: the first two need a large steel mill, pepper a smaller version of the same, while salt calls for ceramic mill.

The background is a classical-style landscape painting of a body of water with distant hills. In the foreground, a large, ornate pepper mill stands vertically. The mill has a red upper section with gold bands and a red lower section. It is positioned inside an open, large scallop shell. Numerous pink petals are floating in the air around the mill. The overall composition is surreal and artistic.

Lasciati sedurre da un'emozione
fatta di materia e forme.
*Be seduced by matter
and form emotions.*

Il macina pepe
decorato con l'arte, quasi dimenticata, della pittura Fiorentina del legno.
Questo macina pepe viene realizzato da un artigiano al quale è stata tramandata la famosa tecnica della decorazione del legno nella tradizione Fiorentina. Ogni dettaglio è realizzato esclusivamente a mano.

Sul corpo di legno di faggio grezzo del macina pepe viene steso uno strato di colla e gesso: dopo un'accurata levigatura si passa alla doratura, mediante applicazione di lamine sottilissime di metallo dorato, poi si effettua la lisciatura con pietre di agata per conferirgli l'aspetto anticato. Speciali formule di vernici vengono utilizzate per esaltare i contorni blu, rossi, verdi e celesti e i disegni ornamentali, il corpo viene poi protetto da una finitura trasparente. Per tutte queste applicazioni si impiegano fino a quattro ore e il risultato è un macina pepe inconfondibilmente unico.

The pepper mill
decorated with the nearly forgotten art of Florentine wood painting.
This pepper mill is still being made in the original way by the surviving craftsman of the famous Florentine wood painting technique. Each detail is exclusively handmade.

First, the solid beechwood body of the mill is covered with a layer of glue and chalk which is then sanded, gilded with superfine sheets of gold leaf and smoothed with agate stones to give it an antique finish. Undisclosed paint formulas are used to illuminate the blue, red, green and light blue edges and ornamental designs, followed by an application of transparent finish. This process takes up to four hours and the result is a pepper mill which is an unmistakably unique piece.
